

## ***Seed Bombs***

**2 parts powdered clay**

**2 parts potting mix**

**1 part seeds of your choice**

**Water----Gloves----Plastic Gloves**

**Measure the powdered clay, potting mix and seeds into a plastic tub. Slowly and gradually add water, mixing with hands, making the consistency of play dough. Roll small amounts of mixture into round balls. Place them in a flat with non-stick paper and let dry. May take up to a week. Toss after last frost into desired area. Let the rain or your own watering take over. The seed balls will start disappearing and you will see seedlings appear.**
